(54) Title: MUTAGENESIS OF ASPERGILLUS FUNGI AND IDENTIFICATION OF GENES ESSENTIAL FOR GROWTH

(57) Abstract: The present invention is directed to polynu-
cleotides encoding proteins Essential For the Growth (EFG)
of filaments fungi. The invention also deals with namely
polypeptides encoded by said polynucleotides, screening assays
for identifying compounds capable of inhibiting said EFG
proteins activities pharmaceutical or phytosanitary compositions
comprising such compounds.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/IB 03/01374

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☒ Claims Nos.: 27-29
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-26 partially

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-26 (partially)

Claims relating to a putative ATP-dependent RNA helicase from *Aspergillus fumigatus*. Polypeptide comprising an amino acid sequence as in SEQ ID NO:3 and subject-matter relating thereto. Polynucleotides encoding the polypeptide of SEQ ID NO:3 such as a polynucleotide comprising a polynucleotide sequence as in SEQ ID NO:1 or SEQ ID NO:2 and subject-matter relating thereto.

2. Claims: 1-26 (partially)

Inventions 2-21:

Claims relating to 20 other EFG proteins and coding DNAs from *Aspergillus fumigatus* as depicted in Table 1 and Table 1 bis of the application.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 27-29

Present claims 27-29 relate to a composition comprising products defined by a parameter or property, namely the ability to bind to the claimed molecules or act either agonistically or antagonistically. The use of this parameter in the present context is considered to lead to a lack of clarity within the meaning of Article 6 PCT. It is impossible to compare the parameters the applicant has chosen to employ with what is set out in the prior art. The lack of clarity is such as to render a meaningful complete search impossible.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
